1. Analysis of Existing App Screens

Screen 1 — Home Dashboard (Problems Found)

- Visual clutter: Header is overcrowded — balance, logo, and greeting all compete for attention.
- Low contrast: Grey text on white background fails WCAG 2.1 AA contrast ratio (4.5:1 minimum).
- Small touch targets: Quick Action icons (Send, Scan QR, Recharge) are below the 44x44dp minimum.
- Color-only transaction labels: Red/green amounts are inaccessible to colorblind users.
- Dense transaction list: No clear spacing between items; date text is too small to read easily.

Screen 2 — Payment Success (Problems Found)

- Dead-end screen: No 'Share Receipt', 'Download PDF', or 'Back to Home' button — user is stuck.
- False affordance: The 'From Accounts' dropdown on a read-only screen confuses users.
- No copy functionality: UPI Transaction ID and Reference ID cannot be copied with a tap.
- Missing next steps: No clear CTA after a successful payment.

2. Redesign Goals

- Simplify navigation — consolidate overlapping paths (Payments tab vs Send Money quick action).
- Improve readability — establish a clear font hierarchy; increase contrast to meet accessibility standards.
- Fix dead-end flows — add CTAs on the success screen: Share, Download PDF, Return to Home.
- Modernize UI — use consistent card styles, spacing, and icons while keeping Kotak's red brand color.
- Increase accessibility — add icon + color dual indicators for debit/credit; min touch target 48dp.

3. Design System

Color Palette

Color Name	HEX	Usage
Kotak Red (Primary)	#C0392B	Headers, primary buttons, highlights
Dark Red (Pressed)	#922B21	Button hover/active states
White	#FFFFFF	Backgrounds, card surfaces
Light Grey	#F2F3F4	Page background, input fields
Success Green	#1E8449	Credit amounts, success icons
Info Blue	#2E86C1	Links, secondary buttons, copy icons
Dark Text	#1A1A2E	Primary body text
Secondary Text	#5D6D7E	Labels, captions, timestamps

Typography

Style	Size	Usage
Display (Balance)	32sp Bold	Account balance, hero amounts
Heading 1	24sp SemiBold	Screen titles, section headers
Body Primary	16sp Regular	Transaction names, content
Caption	12sp Regular	Timestamps, account numbers

Font: Inter. Chosen for excellent mobile legibility and wide numeral support.

Spacing & Components

- Base unit: 4dp. All spacing is a multiple of 4.
- Screen padding: 16dp horizontal. Card internal padding: 16dp.
- Touch targets: Minimum 48x48dp for all tappable elements.
- Cards: 16dp border radius, 2dp shadow (rgba 0,0,0,0.08), white background.
- Buttons: Primary = Red fill + white text. Secondary = Red outline. Height: 48dp.

4. Navigation Structure

Current Problems

- 'Payments' tab and 'Send Money' Quick Action serve the same purpose — redundant.
- No direct 'Accounts' section in bottom nav — users have to find it from a home screen widget.
- Payment success screen has zero navigation options.

Redesigned Bottom Navigation

Tab	What's Inside
Home	Balance overview, Quick Actions, Recent Transactions
Pay	Send Money, Receive, Scan QR, Bill Payments — all in one place

Accounts	Savings Account, Fixed Deposits, UPI Wallet
More	Cards, Loans, Settings, Profile

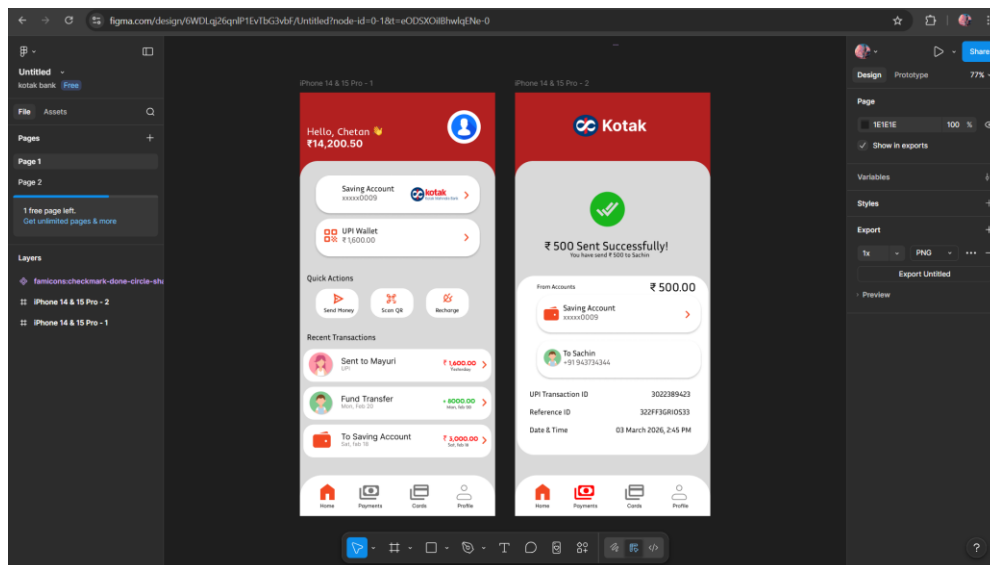

Core Task Flow: Home tap Pay tab tap Select recipient tap Enter amount tap Confirm PIN = Payment Done (5 taps max).

5. Key Design Decisions & Rationale

Design Decision	Why This Was Done
Simplified header — only balance + greeting + profile icon	Removes visual clutter; balance is the #1 priority for users opening the app
Quick Actions as large icon+label tiles (56x56dp)	Touch targets now exceed 44dp minimum; labels remove icon ambiguity
Debit/Credit shown with icon + color (not color alone)	Fixes colorblindness accessibility issue — 300M+ Indians are colorblind
Added 3 CTAs on success screen (Share / Download / Home)	Eliminates the dead-end flow; covers all user needs post-payment
Copy icon next to Transaction ID & Reference ID	Standard pattern (GPay, PhonePe); users copy IDs for dispute resolution
Removed 'From Accounts' dropdown on success screen	Read-only screen needs no dropdown — replaced with a simple info line
